

# *Hotel Module*

## For daily hotel operations

Developed to meet growing needs of small and medium sized hotels, MyPBX Hotel Module integrates rich IP-PBX features with professional hospitality features. Run your hotel with MyPBX Hotel Module to achieve higher productivity and greater profitability.

Hotel Module empowers MyPBX users to intuitively manage the booking and check-in and check-out of customers, check status of each room, offer mini-bar service, and run personalized billing reports, and more daily operational tasks in hotels and other hospitality environments. Improve business productivity and enhance guest experience with the powerful and affordable add-on. Navigate through the Web interface, an orderly hotel and a systematic control of the operations are within grasp.

## Benefits

### Simple solution with rich features

MyPBX Hotel Module brings together a rich set of telephony features and advanced hospitality applications.

### Easy and efficient management

Flexibly and easily manage room check-in and check-out, booking, and call charges, etc. on the Web interface.

### Satisfactory guest experience

Store and retrieve information about guests who are currently staying at your hotel and repeated guests. Recognize repeated guests at check-in to foster guest royalty.

### Better reporting

The billing report shows call charges, mini bar expenses and other expenses that are added when checking out.

### Improved productivity

Enhance the competitive edge of your business. Information about guests can be easily accessed. The system keeps up-to-date records of guests and also minimizes paper work.

### Designed for hotels and other hospitality environments

Suitable for inns, motels, hostels, hotels, and other hospitality environments.
